PENINSULA RESILIENCE PLANNING VIRTUAL COMMUNITY WORKSHOP #1

5

March 13, 2024

INTERPRETACIÓN SIMULTÁNEA DURANTE EL TALLER COMUNITARIO PENINSULA RESILIENCE PLANNING

Peninsula Resilience Planning

Agenda

- 1. Welcome and introductions (5 min)
- 2. Icebreaker Zoom poll (5 min)
- 3. PREP project overview (20 min)
- 4. Q & A (10 min)
- 5. Small group discussions in breakout rooms (35 min)
- 6. Wrap-up and Next Steps (15 min)

Introductions

Project Team

- Cathy Capriola, Capriola Consulting
- Eli Krispi, PlaceWorks
- Lauren Willey, PlaceWorks
- Additional PlaceWorks staff
- Atlas Planning Solutions
- Climate Resilient Communities (CRC)
- Nexus Planning

Public Agency Staff

- County of San Mateo
- City of Belmont
- City of Burlingame
- City of East Palo Alto
- City of Half Moon Bay
- City of San Bruno

Ask questions in the chat.

- The goal of this workshop is to introduce these topics. We want to make sure they are clear and approachable. Please type your questions in the chat and the team will answer them after the presentation.

All feedback is welcome.

- There is no "bad" feedback. We want to hear from all community members.

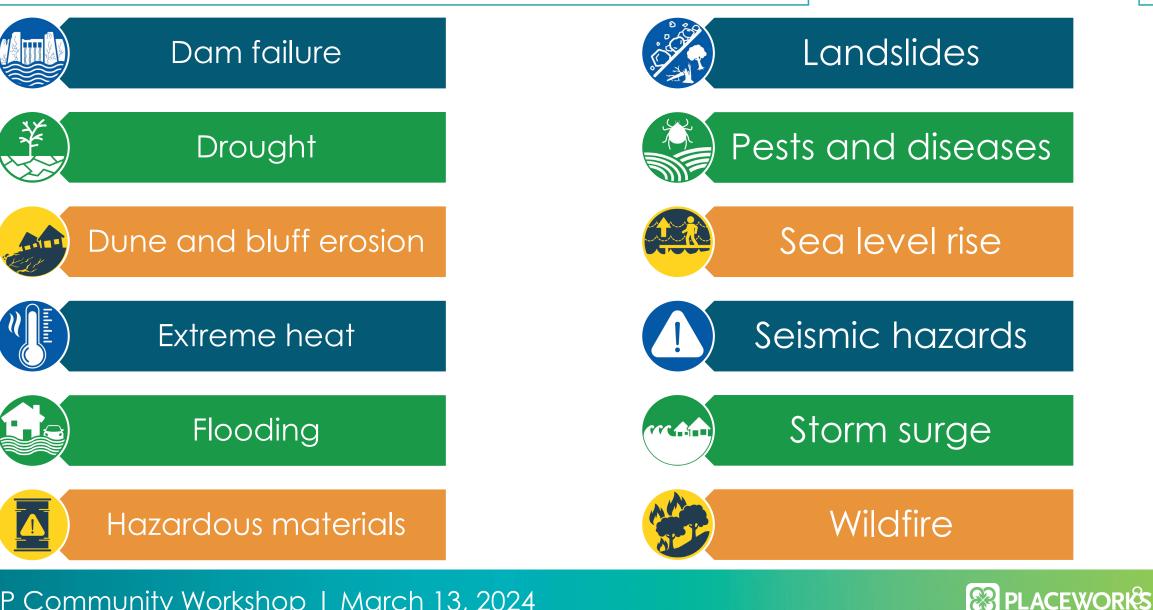

Everyone is welcome.

- Please be courteous and respectful of all participants.

Goals

- Understand how natural hazards, including those driven by climate change, have affected community members.
 - How have you planned for, responded to, and recovered from these hazards?
 - What are your experiences?
- Help community members understand the PREP project, including how it benefits each community and supports local priorities.

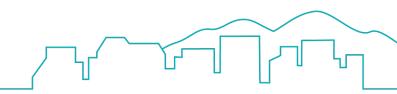

Hazards to plan for

EXAMPLE X EXAMPLE X EXAMP

Zoom Poll Questions:

- 1. Where do you live?
- 2. Where do you work or attend school?
- 3. What climate hazard in your community is of most concern to you?
- 4. Are you familiar with your community's General Plan?

PROJECT OVERVIEW PENINSULA RESILIENCE PLANNING

What is resilience?

The ability to:

- Withstand disasters
- Recover from disasters
- Learn from past events to strengthen future response and recovery.

What is PREP?

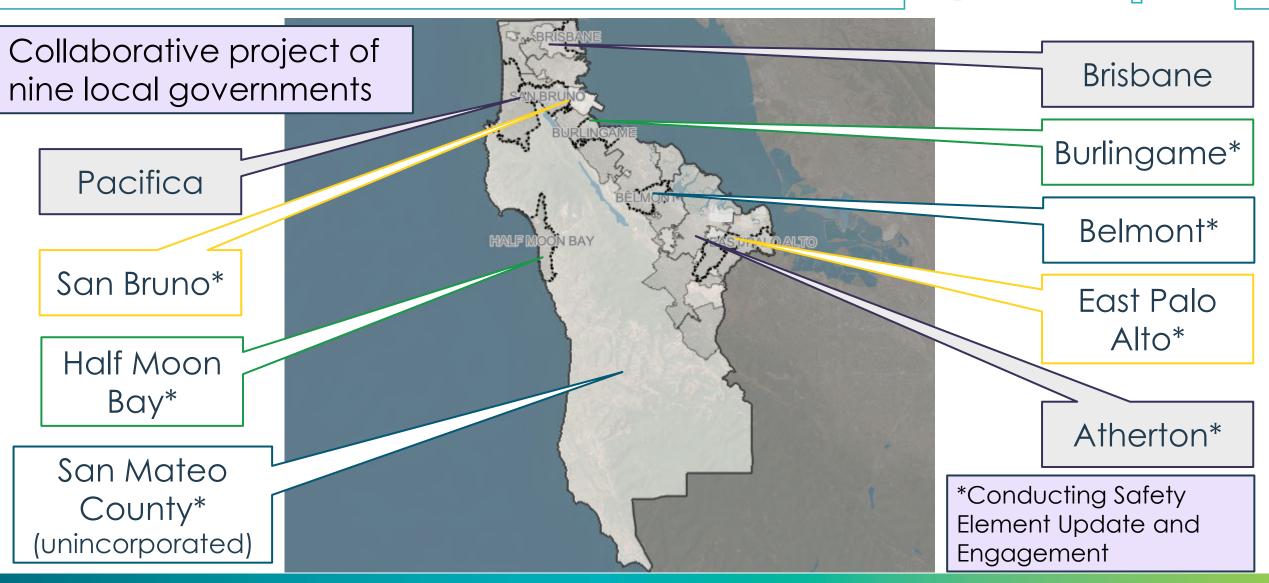

Peninsula Resilience Planning (PREP) is a project to plan for the harm posed by climate change and natural hazards for each participating community.

Includes:

- Vulnerability Assessments
- Safety Element updates
- Community Engagement

What is PREP?

The PREP process

How is the community affected by hazards? Who and what is at risk?

- Vulnerability Assessment
- Hazard and evacuation mapping
- Background reports and studies

What can we do to protect against these hazards and reduce the harm?

- Regional best practices
- Gap analysis
- Goals, policies, and objectives

How can we make these efforts happen?

 Implementation measures and recommendations

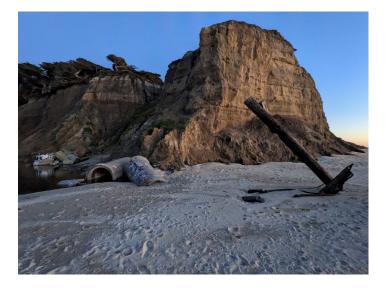

• Safety Element Updates

Community Engagement

PREP Community Workshop | March 13, 2024

What is a Safety Element?

- Required part of a community's General Plan.
 - The General Plan guides how a community will grow and develop.
 - Local officials refer to it when making decisions about land use and other important matters.
- Identifies hazards of concern and related issues.
- Contains policies and actions to protect communities against natural disasters and hazards, such as wildfires.

16

Example language

Goal

• Prepare for, reduce vulnerability to, and adapt to changing climate conditions.

Policy

• Promote vegetation management and fire-resistant landscape design on residential properties and businesses within the wildlandurban interface and very high fire hazard severity zone.

Implementation Action

• Establish a Neighborhood Chipper Program in partnership with FIRE SAFE San Mateo.

PREP Community Workshop | March 13, 2024

Why Update the Safety Element?

- State law requires a review and update of the Safety Element every eight years.
 - New requirement to address climate change vulnerability and climate adaptation and resiliency.
- Pull in successes and goals from other similar plans and newly updated General Plan elements.
- Ensure that the goals, policies, and actions reflect expertise, experience, and needs of the community.

Safety Element and other plans

- Local Hazard Mitigation Plan (LHMP)
 - Provides current detailed information about hazards that we can refer to for background.
- Environmental Justice (EJ) element
 - Addresses pollution burden and other inequities on frontline communities.
 - Three communities are preparing this.
- "Multi-jurisdictional approach"
 - Several cities, towns, or unincorporated areas of the county work together to address a common issue in the region.

PREP Community Workshop | March 13, 2024

20

Step 4. Assess Vulnerability

reduce exposure to harm and increase resilience.

Informs strategy development to

 Evaluates whether policies or programs exist that will help people to avoid impacts and/or

- Assesses how people and community assets may be affected by climate change.

recover quickly.

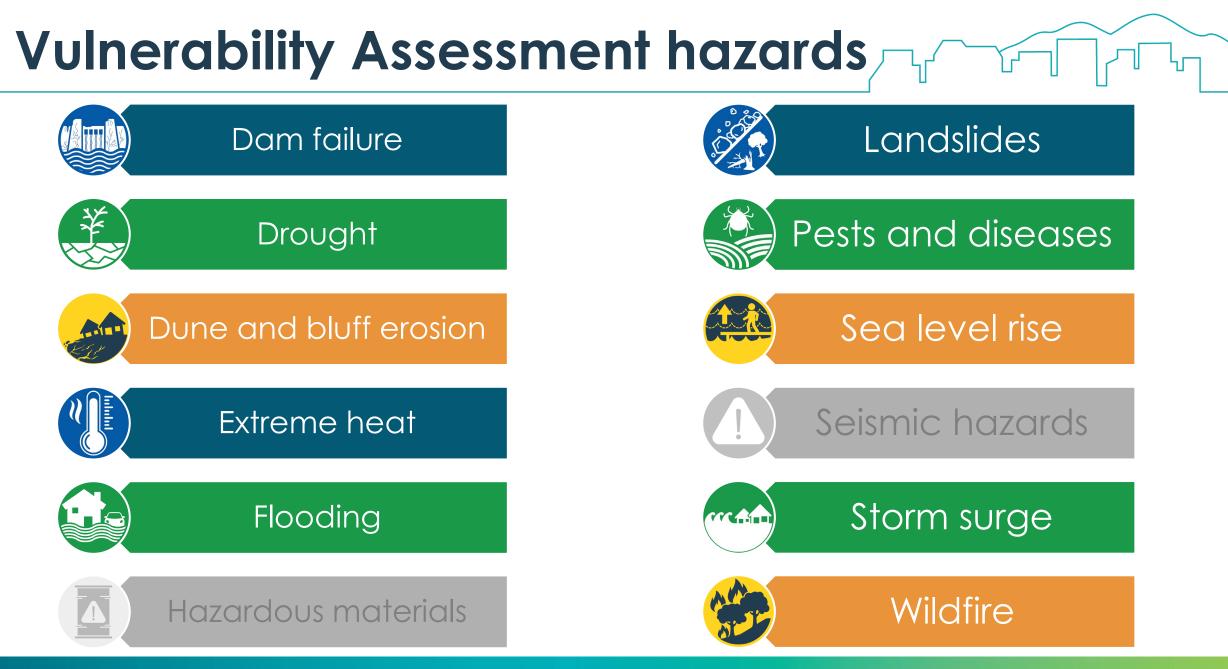

Step 1. Identify Exposure

Step 2. Analyze Sensitivity

Capacity

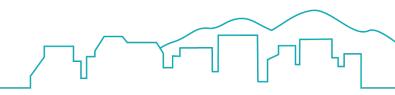

Step 3. Evaluate Adaptive

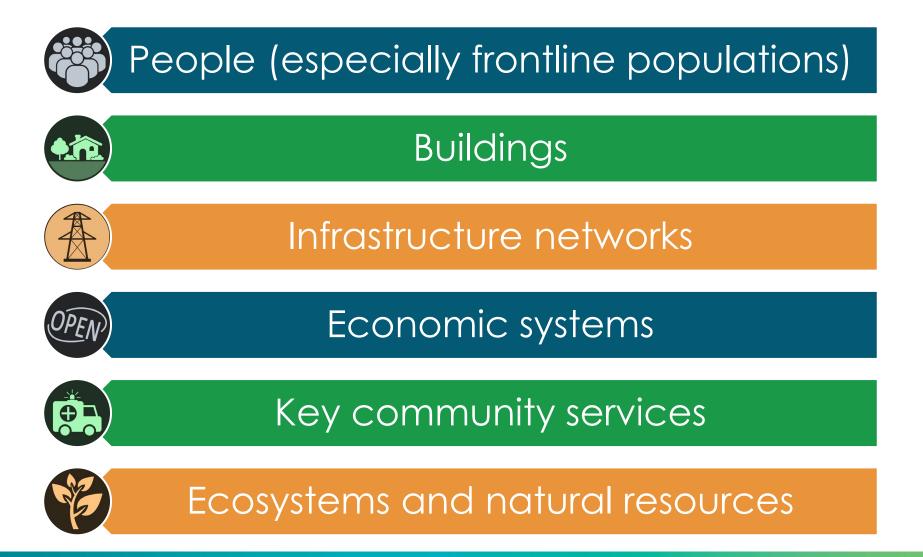

and Potential Impacts

Who and what is at risk?

PREP Community Workshop | March 13, 2024

Existing Studies

- The County and community stakeholders have prepared vulnerability assessments for sea level rise. PREP will include these and build on their findings.
 - South Coast Sea Level Rise Risk and Solutions Study
 - San Mateo County Sea Level Rise Vulnerability Assessment
 - Climate Ready SMC Pilot Project: Half Moon Bay Climate Action and Adaptation Outreach Pilot
 - East Palo Alto Community Vulnerability Adaptation Sea Level Rise Planning Project
 - Sea Change Burlingame

WEBSITE AND MAP VIEWER DEMONSTRATION PENINSULA RESILIENCE PLANNING

Environmental Justice Element Update

State Law requires the Environmental Justice element to consider the following issues within a disadvantaged community:

Three PREP communities are currently updating their Environmental Justice elements concurrent with the Safety Element Update:

- Burlingame - East Palo Alto - San Mateo County

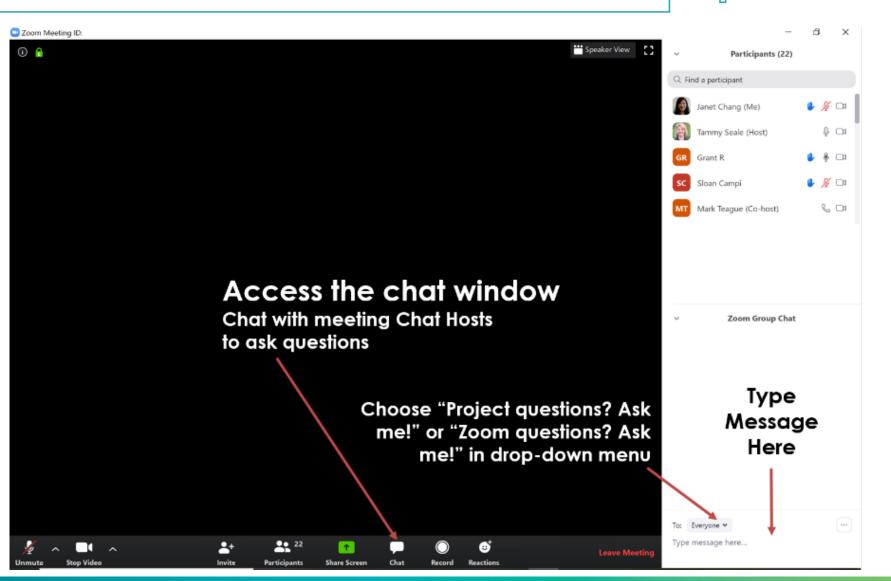

PREP Community Workshop | March 13, 2024

QUESTIONS? PENINSULA RESILIENCE PLANNING

Q&A Session

SMALL GROUP DISCUSSIONS PENINSULA RESILIENCE PLANNING

We will break into small groups to share feedback on community members' experience with natural hazards.

Facilitated discussion will last for 35 minutes followed by a brief report-out of each group's discussion themes by the group moderator.
